## PROFILE SUMMARY

Dedicated Bachelor of Information Technology professional with a passion for front-end web development and a proven track record of delivering high-quality solutions. Proficient in HTML, CSS, and JavaScript, with hands-on experience in designing and developing responsive web applications. Known for my strong problem-solving skills and ability to optimize performance for maximum speed and scalability. Experienced in collaborating with cross-functional teams to translate design concepts into functional code, ensuring seamless user experiences across various devices and platforms. Recognized for outstanding achievements, including successful deployment of high-traffic web applications and accolades for exceptional problem-solving abilities. Committed to continuous learning and professional development to stay abreast of emerging technologies and industry trends.

## PROFESSIONAL SKILLS

Front end web development	Responsive Design	Agile Methodologies
Troubleshooting	Version Control	Performance Optimization

## EDUCATION

<b>Mount Kenya University</b> Bachelor of Information Technology	2021-2024
<b>Kapsigirio Secondary School</b> Kenya Certificate of Secondary Education	2001-2005

## WORK EXPERIENCE

<b>Upwork</b> <b>Senior Web Developer</b> <b>Responsibilities</b>	May 2021-Present
---	------------------

- Designing and developing responsive web applications using HTML, CSS, and JavaScript:Utilizing HTML, CSS, and JavaScript to create visually appealing and interactive web applications..
- Collaborating with UI/UX designers to implement design mockups and wireframes:Working closely with design teams to translate visual concepts and wireframes into functional front-end code.Ensuring fidelity to design specifications and providing feedback on feasibility and usability during the implementation process.
- Ensuring cross-browser compatibility and mobile responsiveness:Testing and debugging code across multiple browsers and devices to ensure consistent rendering and functionality..
- Optimizing web applications for maximum speed and scalability:Analyzing performance metrics and identifying areas for optimization to enhance page load times and overall responsiveness.
- Implementing best practices in front-end development:Adhering to coding standards and best practices to promote code maintainability, readability, and reusability.
- Conducting code reviews and providing constructive feedback:Participating in peer code reviews to identify bugs, improve code quality, and share knowledge with team members.
- Troubleshooting and debugging issues:Investigating and resolving technical issues and bugs reported by users or detected through testing.Employing debugging tools and techniques to identify root causes and implement effective solutions in a timely manner.

- Working closely with back-end developers:Collaborating with back-end developers to integrate front-end components with server-side logic and data sources.
- Staying updated on latest web development trends and technologies:Actively researching and experimenting with emerging technologies, frameworks, and tools to stay ahead of industry trends.
- Providing technical support and assistance to clients:Offering technical guidance and troubleshooting assistance to clients during project implementation and post-launch support.
- Documenting codebase and maintaining version control:Creating clear and comprehensive documentation for codebase, APIs, and development processes to facilitate collaboration and knowledge transfer.Using version control systems such as Git to manage code changes, track revisions, and coordinate team contributions effectively.
- Participating in Agile & Scrum meetings:Contributing to Agile ceremonies such as sprint planning, daily stand-ups, and retrospectives to facilitate project management and team collaboration.Providing updates on project progress, discussing blockers, and coordinating tasks with team members in an Agile environment.
- Collaborating with stakeholders to gather requirements:Engaging with stakeholders including clients, product managers, and business analysts to elicit and clarify project requirements.

### **Key Achievements**

- Successful Deployment of High-Traffic Web Application:Led the development and deployment of a high-traffic web application, resulting in a significant increase in user engagement and satisfaction.
  - Recognition for Outstanding Problem-Solving Skills:Demonstrated exceptional problem-solving skills by resolving complex technical issues and critical bugs within tight deadlines
